ECO PATROL GOES TREE  
PLANTING

LAUNCHING OF SINOP  
BASURA

CLEAN UP SCHOOL DRIVE

## ENVIRONMENT WARRIORS

WRITTEN BY EZRA PIO CELI

Last April 8, Eco Patrol Members have their first tree planting activity at school garden. There were 30 seedling of pine tree delivered by ComRel Department. In line with the nature walk activity, Ms. Luisa Gagarin head of the YES-O Club, said that "Tree planting is a great activity for these little kids to enhance their sense of responsibility for the environment."

There were 7 students from Grade 3- Grace who participated in the said activity. Planting trees may be one of the best methods today to slow today's climate change with it's currently rising temperatures on Earth. This is a project that people around the world can work on together to try to restore the environment in their countries and ultimately the world. Leaders need to be made aware of this solution, and to align experts and make plans to accomplish this on a large scale.

These Environment Warriors, can help through their small acts that starts from the school and eventually they will carry outside or to the community embodying the spirit of Social Involvement.
